Disclaimer

Information in this document is provided in connection with ADLINK products. No license, express or implied, by estoppel or otherwise, to any intellectual property rights is granted by this document. Except as provided in ADLINK's Terms and Conditions of Sale for such products, ADLINK assumes no liability whatsoever, and ADLINK disclaims any express or implied warranty, relating to sale and/or use of ADLINK products including liability or warranties relating to fitness for a particular purpose, merchantability, or infringement of any patent, copyright or other intellectual property right. If you intend to use ADLINK products in or as medical devices, you are solely responsible for all required regulatory compliance, including, without limitation, Title 21 of the CFR (US), Directive 2007/47/EC (EU), and ISO 13485 & 14971, if any. ADLINK may make changes to specifications and product descriptions at any time, without notice.

Environmental Responsibility

ADLINK is committed to fulfil its social responsibility to global environmental preservation through compliance with the European Union's Restriction of Hazardous Substances (RoHS) directive and Waste Electrical and Electronic Equipment (WEEE) directive. Environmental protection is a top priority for ADLINK. We have enforced measures to ensure that our products, manufacturing processes, components, and raw materials have as little impact on the environment as possible. When products are at their end of life, our customers are encouraged to dispose of them in accordance with the product disposal and/or recovery programs prescribed by their nation or company.

California Proposition 65 Warning: This product can expose you to chemicals including acrylamide, arsenic, benzene, cadmium, Tris(1,3-dichloro-2-propyl)phosphate (TDCPP), 1,4-Dioxane, formaldehyde, lead, DEHP, styrene, DINP, BBP, PVC, and vinyl materials, which are known to the State of California to cause cancer, and acrylamide, benzene, cadmium, lead, mercury, phthalates, toluene, DEHP, DIDP, DnHP, DBP, BBP, PVC, and vinyl materials, which are known to the State of California to cause birth defects or other reproductive harm. Safety Instructions

For user safety, please read and follow all Instructions, **WARNINGs**, **CAUTIONs**, and **NOTEs** marked in this manual and on the associated equipment before handling/operating the equipment.

Read these safety instructions carefully.

- Keep this manual for future reference.
- Read the specifications section of this manual for detailed information on the operating environment of this equipment.
- Turn off power and unplug any power cords/cables when installing/mounting or un-installing/removing equipment.
- To avoid electrical shock and/or damage to equipment:
- Keep equipment away from water or liquid sources;
- Keep equipment away from high heat or high humidity;
- Keep equipment properly ventilated (do not block or cover ventilation openings);
- Make sure to use recommended voltage and power source settings;
- Always install and operate equipment near an easily accessible electrical socket outlet;
- Secure the power cord (do not place any object on/over the power cord);
- Only install/attach and operate equipment on stable surfaces and/or recommended mountings;
- If the equipment will not be used for long periods of time, turn off the power source and unplug the equipment.

Conventions

The following conventions may be used throughout this manual, denoting special levels of information

Note: This information adds clarity or specifics to text and illustrations.

Caution: This information indicates the possibility of minor physical injury, component damage, data loss, and/or program corruption.

Warning: This information warns of possible serious physical injury, component damage, data loss, and/or program corruption.

1. Introduction

Warning: This is an EA (early available) engineering manual. The contents may not accurately reflect the actual or final version of this product.

The COM Express approach of custom carrier combined with off-the-shelf system cores relieves developers the need to design their own system core, thereby not only accelerating their proof of concept significantly but also empowers them to upgrade to later-generation processors without having to redesign. It fits most system integration projects with production volumes ranging from 500 to 10,000 pcs per year. The COM Express concept reduces engineering complexity, lowers the threshold for total project quantity, and last but not least brings your product to the market in no time. The average time to design a carrier board is less than half the time of a full custom OEM board.

The Express-BASE6 R3.1, based on PICMG COM-Express R3.1, is an extended ATX size carrier board. Together with the COM Express Type 6 module of your choice and off-the-shelf add-on cards, you can quickly emulate the functionality of your desired end product for software development and hardware verification.

To build a functional prototype of your target system, you will need:

- COM Express Type 6 module
- Express-BASE6 R3.1 carrier
- PCI Express-based storage or SATA storage (SATA storage solutions are dependent on module specifications)

The Express-BASE6 R3.1 carrier is compatible with Basic size and Compact size COMe modules and may accommodate:

- 1x PCI Express x16 slot, 1x PCI Express x4 slots, 4x PCI Express x1 slots
- 1x VGA, 1x DP, 1x general purpose LAN, 2x USB 4.0, 4x USB 3.2, 2x USB 2.0, 1x DB-9 COM port, 1x SPDIF, 1x Line-in/Mic-in/Speaker out.
(at rear I/O)

2. Special Features (Differences from R3.0 Carrier)

Figure 1 – Carrier top view

2.1. One PCI Express Gen4 x16 slot + One x4 Slot

1x FHFL PCI Express Gen4 card at PEG slot and 1x PCI Express Gen4 card at PCIE0_3 slot

2.2. Two USB4 Type-C connector

2x USB Type-C connector that support USB4 spec (thunderbolt 4 compatible), can be used to transmit data or output images

2.3. Onboard Audio

Realtek ALC888 Audio codec onboard, with Audio I/O provided by 1x three-jack connector and 1x SPDIF connector

2.4. Display

1x VGA, 1x DP, 1x LVDS and 1x eDP (BOM option) connector onboard, can display without going through T6DDI

2.5. SD Card

1x SD Card connector (with GPIO function by BOM option)

3. Component Location

Note: All dimensions are shown in millimeters with a tolerance of $\pm 0.25\text{mm}$ unless otherwise noted.

6. Connectors and Pinouts

6.1. Carrier Board Signals — Type 6

Figure 5 – Carrier board signals, type 6 pinout

6.2. Connector Location and Pinout Compatibility

Connector positions and pinouts comply with the pinout and signal descriptions within *PICMG® COM.0 - COM Express Module Base specification, Revision 3.1*. This document includes description of pinouts, signal descriptions and mechanical characteristics of the COM Express specification. The Express-BASE6 R3.1 is compatible with COM Express modules in Basic and Compact form factor, Type 6 pinout, COM.0 Rev. 3.1.

*Signals and Pinout for:
COM Express Type 6.*

6.3. Carrier Board Design

Express-BASE6 R3.1 follows the PICMG COM Express Carrier Design Guide where possible, and its design and schematic have been fully verified. It is recommend to utilize them as references for your carrier board design. Express-BASE6 R3.1 schematics and mechanical files, as well as the CDG, can be downloaded from ADLINK COM's webpage.

11	+12V	23	+5V
12	+3.3V	24	COM

ATX_4: ATX 12V 4-pin Connector.

Connect the ATX 12V 4-pin connector to supply power to the COM Express Base R3.1 carrier

Pin	Signal
1	GND
2	GND
3	+12V
4	+12V

**6.24. Carrier EEPROM Address Switch**

6.25. Other Jumpers

JP33: Switching Module GPIO or SDIO signal workable.

JP33	Status
1-2	SD_CARD workable (default)
2-3	Module GPIO Header workable

JP3: SIO I/O Address

JP3	Status
1-2	4Eh
2-3	2Eh (default)

JP6/JP7: BIOS Select

JP6	JP7	Status
1-2	1-2	Module SPI (default)
2-3	1-2	Carrier FWH
1-2	2-3	Carrier SPI0
2-3	2-3	Carrier SPI1

JP27: LVDS Backlight Enable.

JP27	Status
1-2	Low Active
2-3	High Active (default)

JP34: LVDS Backlight PWM Control Source.

JP34	Status
1-2	GPU
2-3	LVDS I2C (default)

JP35: LVDS Backlight control Mode.

JP35	Status
1-2	Voltage level
2-3	PWM (default)

JP28: LVDS Panel Power.

JP28	Status
1-2	3.3V (default)
2-3	5V

JP29: LVDS Panel Backlight Power.

JP29	Status
1-2	12V
2-3	5V (default)

JP31: Carrier Power Mode.

JP31	Status
1-2	ATX mode (default)
2-3	AT mode

JP32: VCC_12V On/Off during S3/S5 (In AT mode, put pin 2-3 to output 12V during S3/S5.)

JP32	Status
1-2	ATX to Module (default)
2-3	AT to Module

JP40: BIOS Boot Device Select.

JP32	Status
1-2	LPC Mode (default)
2-3	eSPI Mode

JP41/JP42: BIOS Boot Device Select.

JP41	JP42	Status
1-2	2-3	RS-232 (default)
2-3	1-2	RS-485
1-2	1-2	RS-422

JP43: SIO Enable and Disable.

JP43	Status
1-2	Enable SIO (default)
2-3	Disable SIO

JP5: Clear CMOS

To clear CMOS, shut down the power and short pins 2 and 3 (short VBT to ground)

Jumper	Status
1-2	Normal <<<<
2-3	Clear CMOS

7. Switches, POST, and LEDs

7.1. Switches (S0-S5)

There are two switches, at the center and lower-right of the carrier.

PWR_BTN

Indicates getting into S0 from S5 of the system.

RST_BTN

Indicates resetting of the system.

7.2. POST and Inductor LEDs

An eSPI-based POST display is added for debugging.
The two 7-SEG LEDs shows the actual **POST data**.

A row of mini-LEDs below the POST display indicates the following:

S3: Indicates S3 status

5VSB: ATX power attached on standby or active

HDD: Indicates HDD activity

PWR_ON: Indicates power on

7.3. ATX Power Connectors

The COM Express Base6 R3.1 has one **ATX 24-pin connector** to supply power to the carrier board and one **ATX 12V 4-pin connector** to supply power to the COM module.

The system will not power on unless an ATX 12V 4-pin connector is connected.

If your power supply has a 24-pin ATX connector, then attach the connectors as shown.
